Re: Certification 001-04 for Earthquake Bracing System for Residential Water Heaters
Models: FR-80, FR-120, SR-80, SR-120, WR-80, and WR-120

Dear Mr. Youngberg:

We have reviewed your re-test report dated February 23, 2004, and concluded that the models listed above have met our published requirements in *DSA Review and Acceptance Procedures – Manufactured Earthquake Bracing Systems for Residential Water Heaters*.

Your DSA certification number is 001-04. Local jurisdictions or building departments may have different requirements. DSA neither warrants nor implies acceptance of this certification by any building department or organization.

Please feel free to contact me at 916-324-7180 or Terence Fong at 916-324-7099 if you have any question.

Regards,

Richard Conrad
Manager, Program Evaluation and Development
